

CompassIQ

An AI system that diagnoses project maturity, scores across 5 dimensions, and delivers a personalized roadmap — grounded in real Tunisian resources.

CONCRETE GUIDANCE FOR TUNISIAN ENTREPRENEURS.

Detection

Intelligently uncovering entrepreneurial potential and unique needs.

Evaluation

Providing objective, data-driven assessment across key dimensions.

Roadmap

Delivering personalized, actionable plans with verified resources.

Tunisian entrepreneurs are poorly oriented

3 structural barriers block access to the right resources

Fragmented Information

Programs exist but are scattered, inaccessible, and never tailored to the specific project profile.

No Objective Diagnosis

No tool determines the real maturity stage of a project. Guides are static, generic, and non-adaptive.

Perception ≠ Reality

Founders overestimate their readiness — applying to the wrong programs at the wrong time.

3 AI modules — integrated around one shared project profile

Not independent panels — one coherent system where every module feeds the others

01

Adaptive Diagnostic Engine

- ✓ Dynamic branching questionnaire
- ✓ 6-stage maturity classification
- ✓ Self-perception vs. reality gap detection
- ✓ Priority blocker identification

02

Explainable Multi-Dim. Scoring

- ✓ 5 scores: Market · Offer · Innovation
- ✓ Scalability · Green Impact
- ✓ Weighted, documented criteria
- ✓ Plain-language AI justification

03

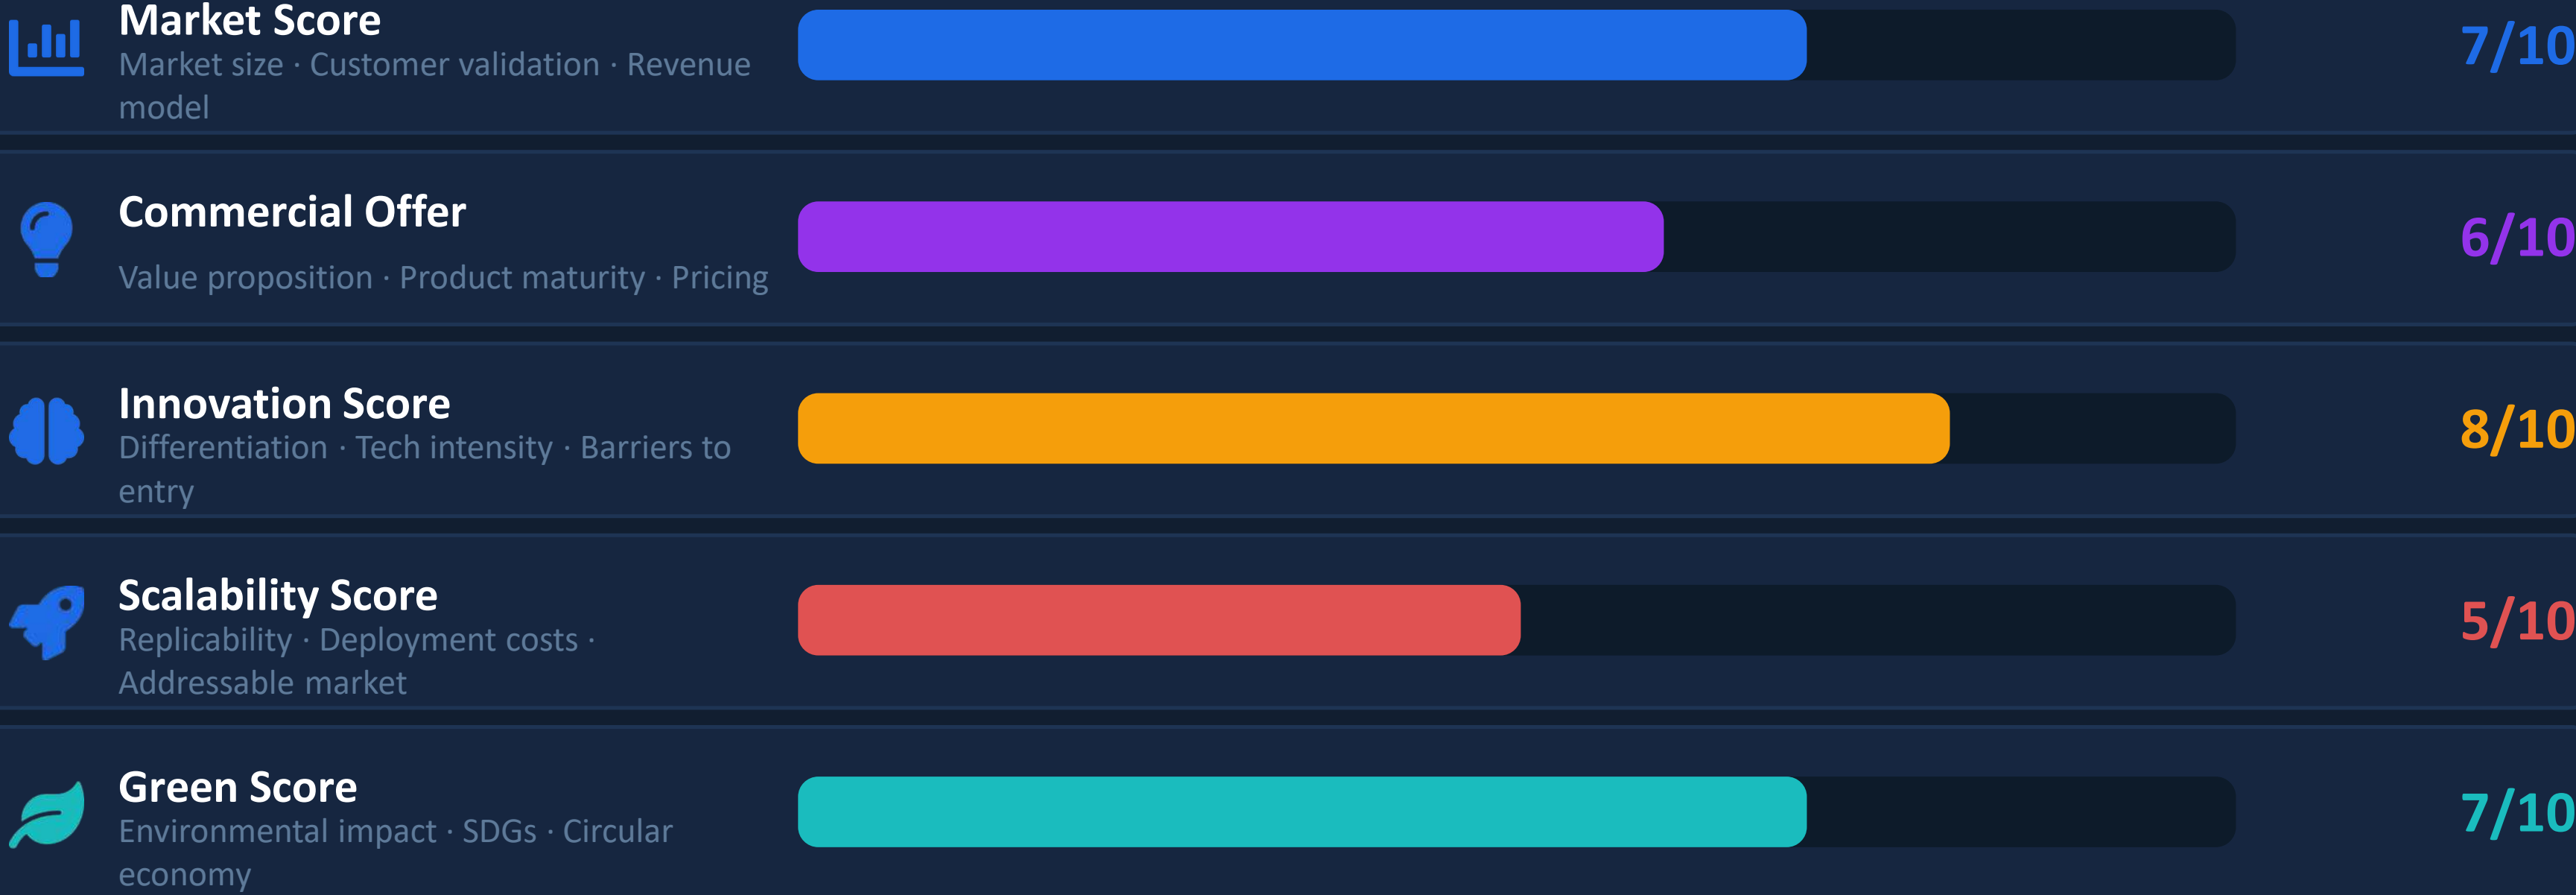

RAG-Grounded Roadmap

- ✓ 30+ real Tunisian resources
- ✓ Personalized prioritized roadmap
- ✓ Every recommendation source-traced
- ✓ Persistent 'Mon Parcours' view

5 dimensions — every score is traceable

Weighted criteria · AI justification · Anomaly detection

30+ real Tunisian resources — every rec is source-traced

No hallucinations accepted · RAG retrieval · Updatable without pipeline rebuild

10

Accompaniment Programs

APII · ANPE
Incubators · BTS

8

Financing Devices

BFPME · AFD
UNDP · Startup Act

7

Admin & Regulatory

Business creation
Forms · Contacts

6

Ecosystem Actors

Mentors · Networks
Associations

Retrieval is traceable · Every recommendation cites a real source · No hallucinated program names

From idea to roadmap in under 2 minutes

End-to-end scenario on a real Tunisian AgriTech founder profile

1

Adaptive Intake

7 dynamic questions
Branching per answers
AgriTech sector detected

2

Diagnosis

Stage: Structuration
Gap: +2 overestimated
Blocker: revenue model

3

AI Scores

Innovation 8/10
Scalability 5/10 ⚠️
AI justification generated

4

Roadmap

Immediate actions
APII + Startup Act
90-day prioritized plan

Defined protocol — executed — results documented

Synthetic test set · 3 metrics · Gap detection validated on 3 cases

85%

Classification
Accuracy

20 labelled synthetic profiles

4.2/5

Scoring
Consistency

Inter-rater (3 evaluators)

90%

30 test queries

Gap Detection — 3 Validated Cases

Case 1: Self-rated "Funding-ready" → Diagnosed "Structuration" | Case 2: Underestimated by 2 stages | Case 3: Contradictory KPIs flagged automatically

Every criterion addressed — explicitly

PNUD · GEWEET · AI Experts · Entrepreneurship Practitioners

25%

Real-world Impact

Tunisian context · Real resources · Credible adoption path

25%

Technical Depth

Non-trivial AI pipeline · Weighted scoring · Traceable RAG

20%

Prototype Quality

End-to-end demo · Realistic inputs · Non-technical UI

15%

Explainability & Rigour

Criteria visible · Classifications traceable · Uncertainty surfaced

15%

Evaluation & Metrics

Metrics defined · Test set · Results documented

What we have · What we improve · Our roadmap

Intellectual honesty: we know our limits and have a credible plan

Current Limitations

- KB of 30 sources (extensible to 100+)
- Synthetic test set (real users next)
- French UI only (Arabic in progress)
- Not yet deployed in production

Next Steps

- ✓ Pilot with 10 real Tunisian entrepreneurs
- ✓ Full Arabic language support
- ✓ Partnership APII / PNUD / GEWEET
- ✓ Open API for the TN ecosystem

Thank You

Thank You for Your Time.
